

AI Governance for Executives & Management

Gain the confidence to lead AI adoption responsibly

Course title	<i>AI Governance for Executives & Management</i>	Course code	<i>SL-AI-301</i>
Duration	<i>4 hours</i>	Level	<i>Intermediate</i>
Audience	<i>Executives & Management (Leadership)</i>	Format	<i>E-learning</i>
Language	<i>English</i>	Last updated	<i>08.10.2026</i>

Course Description

Artificial Intelligence is transforming organizations across every industry, creating new opportunities for innovation, productivity, and growth. To realize these benefits responsibly, organizations must establish effective governance, manage risks, comply with emerging regulations, and maintain appropriate oversight.

This course provides executives and managers with the knowledge and practical frameworks needed to govern AI responsibly, assess AI-related risks, understand regulatory expectations, and make informed decisions about AI adoption, oversight, and organizational readiness. This course contains many engagement elements and simulation scenarios to activate learning.

Learning Objectives

- *Recognize key AI concepts including Artificial Intelligence, Machine Learning, Deep Learning, and Generative AI.*
- *Define key AI governance concepts, principles, and terminology.*
- *Explain how AI governance supports organizational strategy, trust, compliance, and value realization.*
- *Apply governance principles when evaluating AI initiatives and investment proposals.*
- *Use governance frameworks to assess AI use cases, risks, and business impacts.*
- *Analyze AI risks across legal, operational, reputational, cybersecurity, ethical, and business dimensions.*
- *Evaluate AI governance maturity within an organization.*
- *Design a high-level AI governance operating model aligned with organizational objectives.*
